

# Estualia courses for companies

Obtain info about what we do

# Objectives of the project

**Improve Language Proficiency:** Facilitate employees' development of strong language skills in English, specifically at levels B1, B2 and C1 of the Common European Framework of Reference for Languages (CEFR).

**Promote Effective Communication:** Encourage conversational fluency and confidence in communicating in English, both orally and in writing.

**Adapt to New Technologies:** Use e-learning platforms and digital tools to offer a modern and flexible learning experience.

**Incorporate Native Teachers:** Provide employees with the opportunity to learn from native professionals, which will enrich their cultural understanding and pronunciation.

**Customize Schedules:** Adjust class schedules according to the needs and availability of the company and its employees.

# Methodology

## **Live classes with native teachers:**

We will conduct live classes with highly qualified native teachers in Business English.

These sessions will focus on conversational practice, error correction and the application of theoretical concepts in real situations.

## **360° E-Learning Platform:**

We will complement face-to-face classes with an e-learning platform. Employees will be able to access resources, exercises, evaluations and additional material online.

The platform will allow for individualized progress monitoring and self-assessment.

## **Role Play Dynamics and Real Scenarios:**

We will encourage immersive learning through role play.

Students will simulate work situations in English, such as meetings, presentations and negotiations.

This will help overcome the barrier of “letting go” when speaking English.

# What we offer

English  
courses

B1

B2

C1

English focused on  
commerce

**A course for your employees to be able to perform correctly in international trade environments, which will help your company to expand and consolidate itself in an increasingly globalized world.**

# Our compromise

## Flexible schedules

Classes will be adapted to the company's work schedules.  
We recommend a standard teaching load of 2 hours per week, distributed on alternate days.  
During holiday periods, classes will be suspended.

## Assessment and follow-up

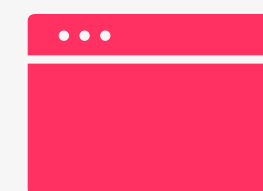

We will conduct periodic evaluations to measure employee progress.  
The results will be used to adjust the methodology and customize training.

## Funding

This project can be funded through FUNDAE (Fundación Estatal para la Formación en el Empleo).  
We are committed to making the Language School a success for people and companies.
