Presentation

We are Estualia, an online English academy and training center with more than 15 years of experience. Our goal is to help you improve your English level by sharing the necessary skills to increase your self-confidence and allow you to communicate fully in a personal and professional environment. We know that learning a language can be a challenge, but also an opportunity to grow personally and professionally. That is why we offer you English classes adapted to your needs, objectives and interests, with a dynamic, practical and personalized methodology.

Justification

Today's society is increasingly characterized by contact between people from different cultures and speaking different languages. For various reasons, many of these exchanges between individuals who do not share the same mother tongue take place in English. Undoubtedly, English has become the international language par excellence in both personal and professional environments. Hence the importance of knowing and being able to use this language.

Languages open doors that allow communication with people from any part of the world. Therefore, it is essential to offer to the whole society, regardless of age, social class, studies, etc. the opportunity to begin to know English as a vehicle for communication and personal and professional growth. The courses offered cover all these needs and are adapted to the reality of the participants. At the end of the course, participants will be able to understand and express, orally and in writing, messages in English.

Proposal

Course to obtain an official English B1, B2 or C1 certification from Cambridge, Trinity, Aptis ESOL or Oxford for all ages.

English review for children between the ages of 5 and 16 as part of the Corresponsables Plan.

Proposal

**Courses for the unemployed,
retirees and so on. On demand,
either
initiation or continuation.**

Means

The means used for the development of all the courses offered will be provided by the person who teaches the course.

Numerous resources are available for the achievement of the objectives. Although it is not common, if any course requires the acquisition of any complementary or mandatory material, whether a specific book or other material, this will be paid by the student or by the contracting company, as agreed.

The contracting company must provide the place where the course will be held, as well as a projector with HDMI and wifi connection.

It would be interesting to have a whiteboard for the delivery of the courses, although it is not strictly necessary.

It is offered the possibility of recording the sessions so that people, who for various reasons, cannot attend any of the sessions of the course can watch the classes and can follow the course without being left behind.

Budget

The budget for each course depends on the number of participants and the number of hours contracted, as well as whether the costs of the course are assumed by the participants or by the contracting company.

Depending on the course to be contracted, a negotiation will be carried out by both parties.

As a guideline prior to the negotiation, the price per hour will vary depending on the nature of the course, the participants, the duration and the requirements of the course.

For more information, or to initiate a negotiation, please do not hesitate to contact us through the means provided in the following section "Contact".
